

# Start a Health Surveillance Episode

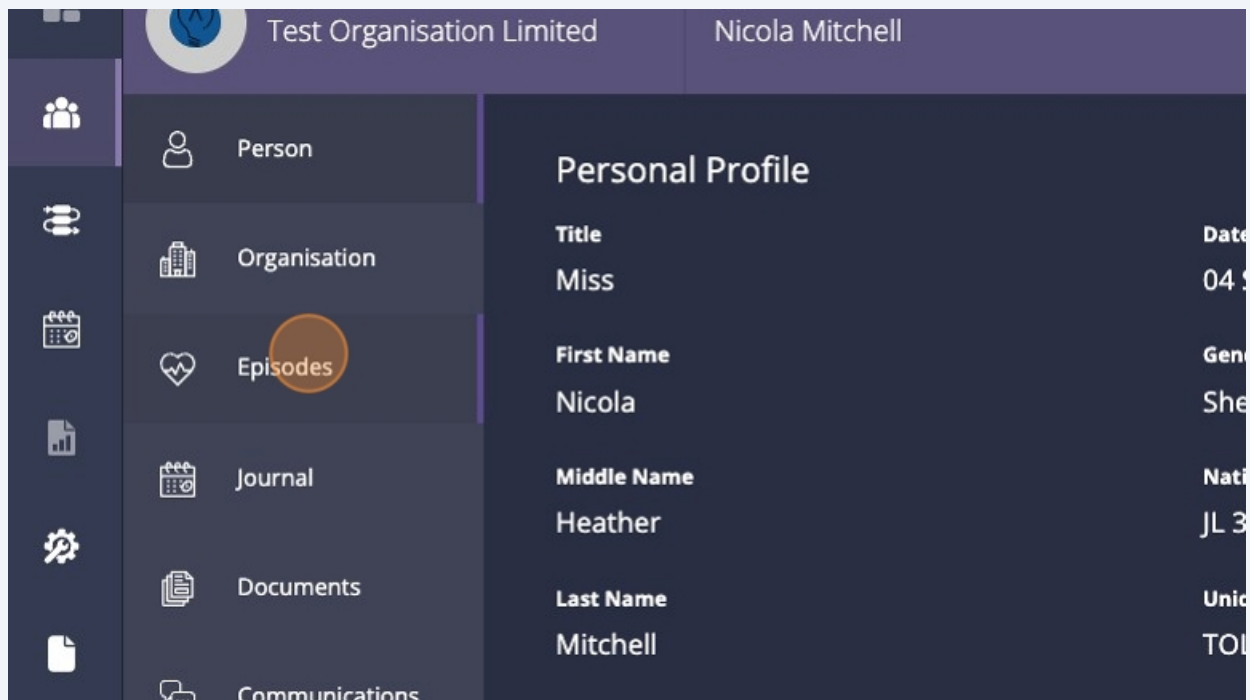

Learn how to start a new Health Surveillance episode for a person in MediWork

- 1
- In MediWork, find the right person in the **People View**

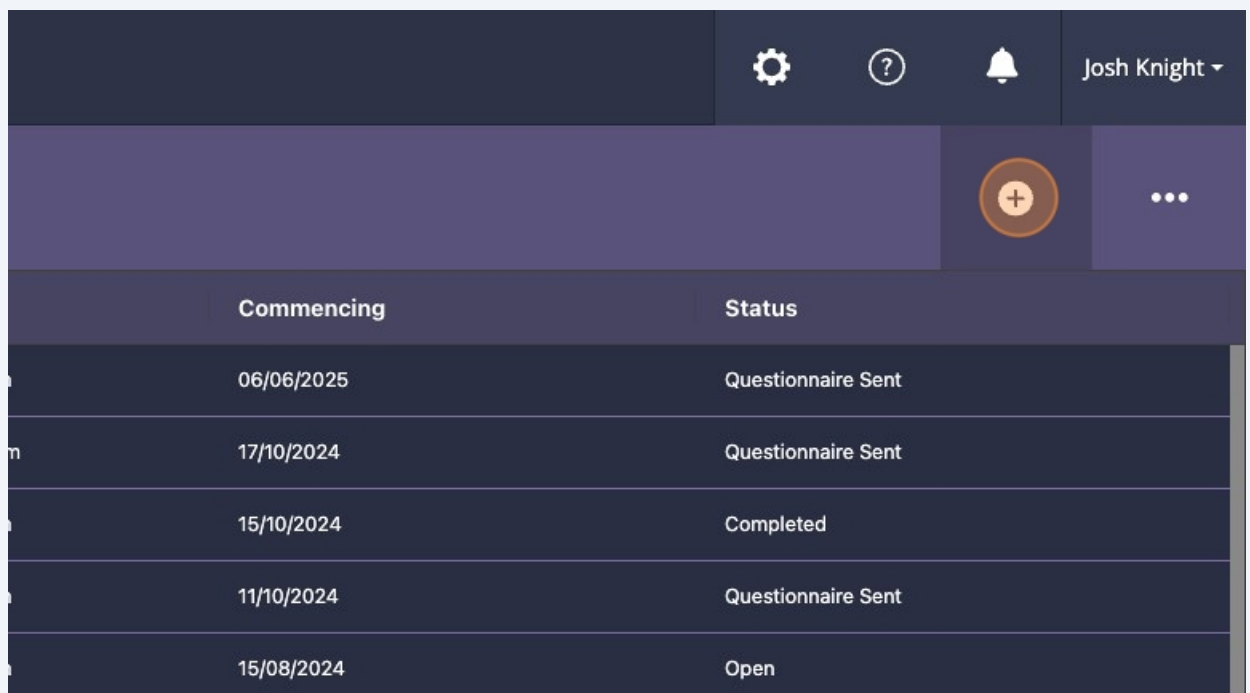

- 2
- Click on the person's row to open their record

<div><div></div><div><div>Client</div><div>Test Organisation Limited</div><div></div></div></div>			
	First Name	Last Name	Created
L-000001	Rebeka	Mayer	01/09/202
L-000002	Nicola	Mitchell	04/09/202
L-000003	James	Grant	05/09/202
L-000004	Ray	Liotta	05/09/202
L-000005	Frank	Williams	05/09/202
L-000006	Emily	Davies	05/09/202

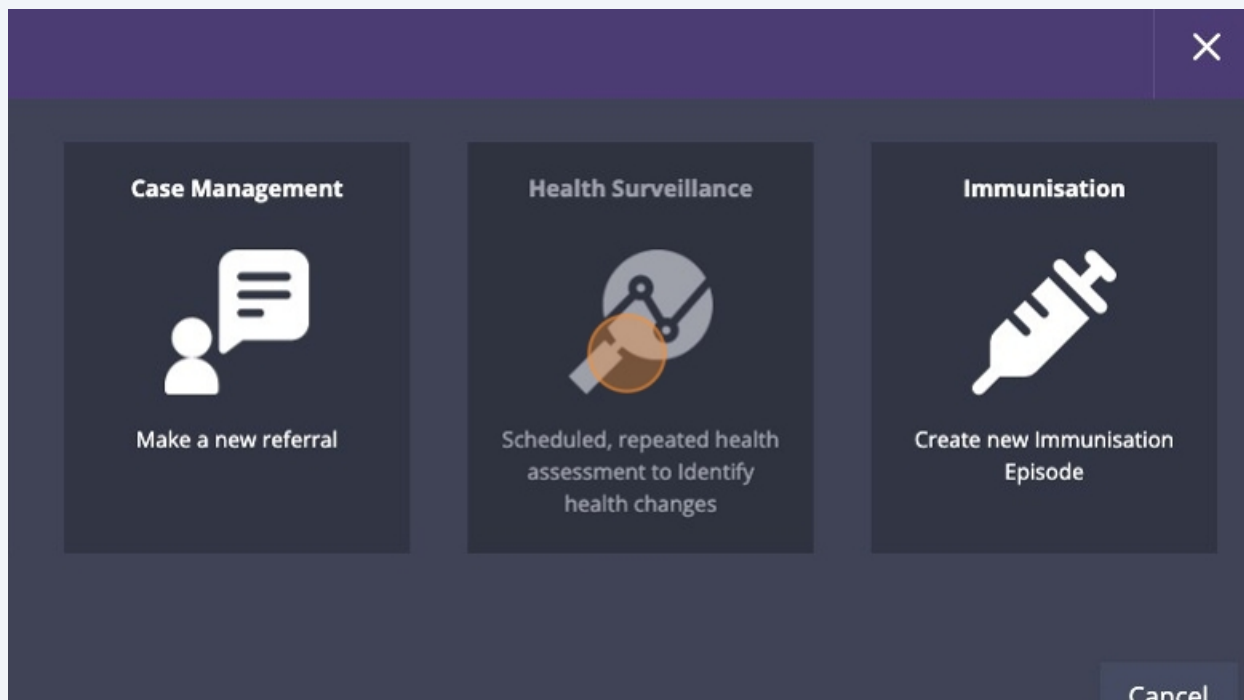

3 Click "Episodes"

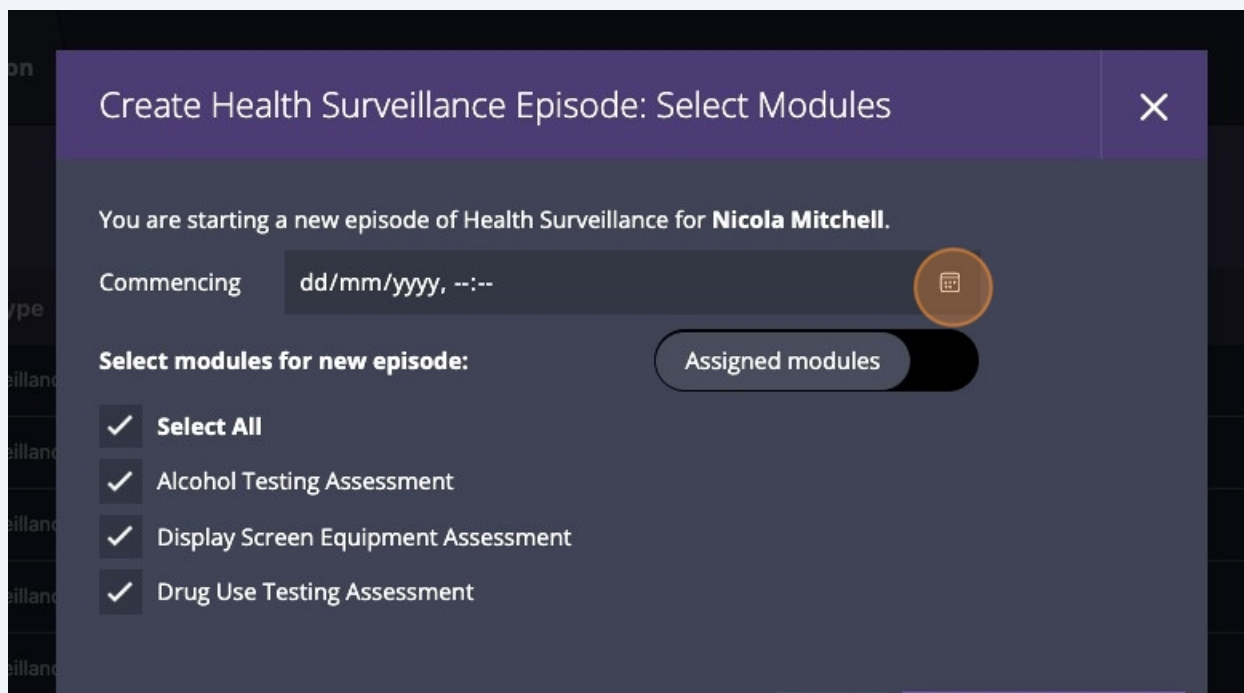

4 Click the "Add new Episode" icon

5 Click "Health Surveillance"

6 Choose a Commencing Date for when this Health Surveillance Episode will be run

You can set a Health Surveillance Episode commencing date to any date in the diary - it can be a past episode (to post-fill details for work that has happened), a current date (for an episode that is running now), or a future date (to prepare for a Health Surveillance recall in the future).

7

Select the modules the person should be surveilled under.

MediWork suggests modules based on the person's groups in their profile. Click "Assigned Modules" to view a list of all available modules, and add any you believe are missing.

Create Health Surveillance Episode: Select Modules

You are starting a new episode of Health Surveillance for **Nicola Mitchell**.

Commencing 22/11/2024, 13:34

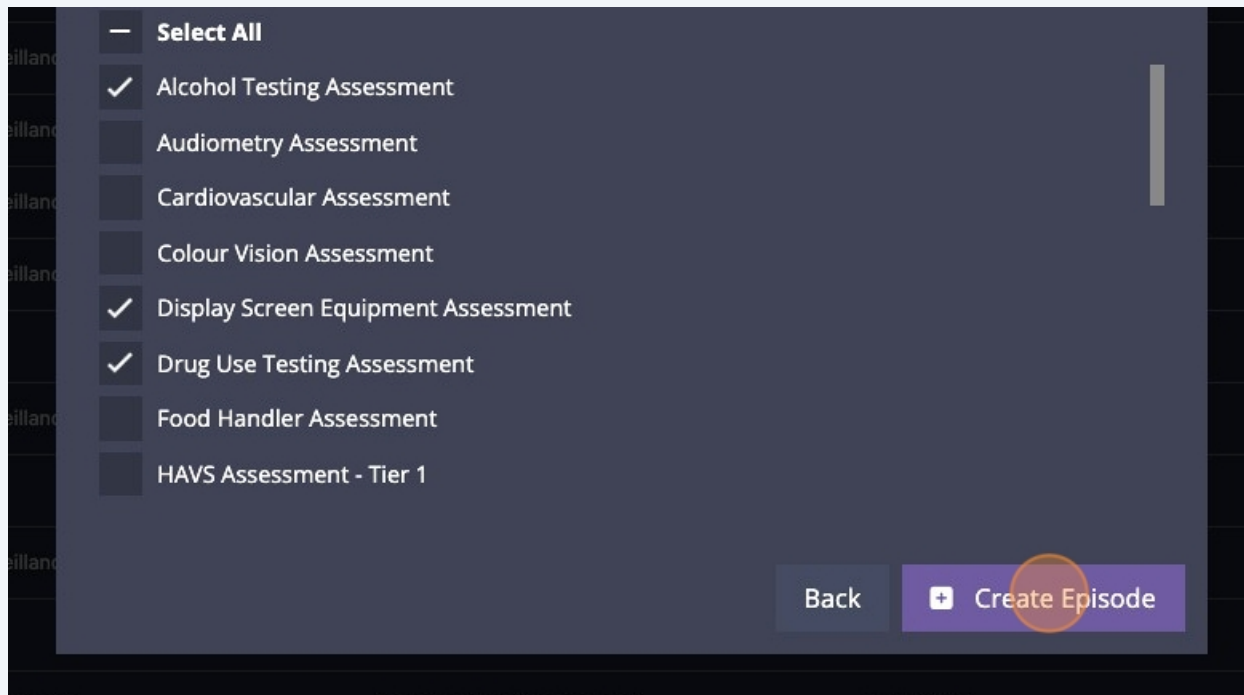

Select modules for new episode:

Assigned modules

- ☒ Select All
- ☒ Alcohol Testing Assessment
- ☒ Display Screen Equipment Assessment
- ☒ Drug Use Testing Assessment

8

Once you've selected and confirmed all the modules you want the person to be surveilled under, click "Create Episode"

9

The Health Surveillance Episode is now created and will open automatically.
